INTRODUCTION AND HIGHLIGHTS

Source Data:

The crime related data contained in this report are derived from a number of computer sources. These systems include, but are not limited to:

- eCOPS - Enterprise Case Occurrence Processing System
- COPS - Computerized Occurrence Processing System
- CIPS - Criminal Information Processing System

These systems are continuously being updated and as a result some changes to statistics published in previous statistical reports should be expected.

Crime statistics contained in this report are based on the date that the information was reported or became known to police. This is done to minimize the impact of producing statistics from these real time systems.

Other data comes from a mixture of automated and manual systems maintained by the individual units responsible.

Comparing Crime Statistics:

The statistics in this report count all offences reported to the police. As a result a single incident reported to police may generate more than one offence.

It is not recommended that the crime statistics in this report be compared to crime statistics prepared by other agencies due to the fact that different methods of categorization, geographic, technical, data and time constraints may affect the outcome.

Although comparing exact numbers is not recommended the general trends and magnitude of change should be similar regardless of the counting method.

Detailed information pertaining to methods used by Statistics Canada in their crime reports can be found on their website, <http://www.statcan.ca>.

Highlights:

In 2006 there was a small increase in overall crime reported which totalled 1%. This translates to just under 2000 offences. Significant decreases were seen in the area of Murders and Sexual Assaults. These categories realized 13.8% and 8.5% decreases respectively.

There was a shift in the type of premises being entered from apartments to houses however the over all trend for residential break and enters was an increase of approximately 2.8%.

The overall number of traffic collisions decreased by 2.4% for the second consecutive year. In spite of this traffic fatalities increased from 54 to 57 and personal injury accidents increased from 11,128 to 11,994 or 7.8%. The R.I.D.E. programme resulted in 399,419 vehicles being stopped an increase of 44.9%. These stops resulted in 282 drinking and driving related arrests a decrease of 9.0%
